It Was Dark Over Westphalia

Quick Take – What Sort of Deceptive Nonsense is Cytodyn Spewing Now? (CYDY)

Finally, it is the 21st of July and the long awaited trial “results” from everyone’s favorite reverse-merger pink sheet Coronacraper, Cytodyn (CYDY) have arrived! Well, not really, because the company didn’t really announce any real results this morning (read more about that [here](https://www.statnews.com/2020/07/21/cytodyns-covid-19-drug-troubles-escalate-efficacy-data-are-missing-from-study/) (<https://www.statnews.com/2020/07/21/cytodyns-covid-19-drug-troubles-escalate-efficacy-data-are-missing-from-study/>)). What The NaDDir* did announce was a collection of bizarre ramblings about wonder drug leronlimab’s supposed safety from the Phase 2 trial of leronlimab in mild/moderate Covid patients (trial details [here](https://www.clinicaltrials.gov/ct2/show/NCT04343651) (<https://www.clinicaltrials.gov/ct2/show/NCT04343651>)).

From this morning’s press release:

The headline? Impressive Results....39% of patients in (the) placebo arm had SAEs as compared to only 14% of patients in (the) leronlimab arm.

More like impressive bullshit. Just a few lines later one can see that **6 out of 28** patients in the placebo arm, and **5 out of 56** patients in the leronlimab arm reported SAEs. That’s actually **21.4%** and **8.9%**.

Coming from the same clown crew who still can’t manage to file an acceptable BLA submission, is their failure to do simple math much of a surprise? Or was this a deliberate deception to make leronlimab somehow look more appealing in front of tomorrow’s shareholder meeting where management is hoping to get **another 100mm** shares authorized so the dilution can continue unimpeded.

*Spelled thusly for a **double dose** of that sweet sweet **stock pimping**.

Stock hacking for the mentally impaired. A little DD would expose you as a fraud to anyone who investigates your bogus claims.

[Yes Clyde. Anyone dumb enough to be a Cytodyn shareholder is likely mentally impaired. And yes, The NaDDir's ridiculous claims have time and again been proven to be completely bogus. – Editor]

More garbage from the idiots over there at buyer's strike. Inanity on display for all to see. You really have no idea what you're talking about, do you? Expect a knock on the door any day from the SEC and/or the Feds. We have people on it right now.

[Sure you do. – Editor]

Your use of the term The NaDDir is also extremely offensive and borderline racist. But you knew that already. Sleep well, turds.

[Waaaaah! Some bagholding soyboy from the San Antonio University Health System is whining about racism. Get a refund on your Grievance Study classes and take a math class. – Editor]

Yeah the fda allows con men and companies to do drug trials. Shut up idiot.

[Yes, they do actually. Quite often. If you can manage to fill out an IND correctly, and you have the cash to pay the hospitals their fees, anyone can do a clinical trial. Con men and craptacular reverse merger scam companies included. – Editor]
